

## REMARKS

Claims 1-5 and 13-17 were rejected under 35 U.S.C. § 103(a) over U.S. Patent No. 5,564,005 to Weber et al. in view of U.S. Patent No. 6,289,363 to Consolatti et al.

Claim 1 has been amended to recite a method that includes providing a first agent with a narrative framework which comprises content elements, automatically sequencing and editing the narrative framework in the first agent, automatically modifying the dynamically generated narrative in a second agent based upon the delivery context, and rendering the modified narrative in the second agent for presentation to the user. Neither Weber nor Consolatti suggest all the limitations of claim 1 as amended, and claim 1 is therefore allowable.

Independent claim 13 has been similarly amended, and is believed to be allowable for the same reasons. The remaining claims depend from either claim 1 or 13, and are therefore believed to be allowable.

This application is in condition for allowance, and such action is respectfully requested. If the Examiner has any questions or comments, he is invited to telephone the undersigned. Applicant does not believe that additional fees are due, but if the Commissioner believes additional fees are due, the Commissioner is hereby authorized to charge any fees that may be required, or credit any overpayment, to Deposit Account Number 50-3797.

Respectfully submitted,
